BANKWISE · MARKETING INTELLIGENCE

Bank Marketing Prediction

Understand customer behaviour. Predict term-deposit subscription using machine learning.

Enter customer details below to predict their likelihood of subscribing to a bank term deposit.

Model Performance

Evaluation on the held-out test set. Precision, recall and F1-score refer to the YES class.

Model	Accuracy	Precision	Recall
Balanced Logistic Regression	75.57%	26.69%	62.29
Decision Tree	84.35%	32.02%	30.06
Random Forest	88.00%	48.43%	39.32
Balanced Random Forest	84.16%	38.37%	58.32

Best F1-score: Balanced Random Forest (46.29%). Highest accuracy: Random Forest (88.00%). Highest recall: Balanced Logistic Regression (62.29%).

Customer Information

Age: 35

Job: management

Marital Status: married

Education: secondary

Account Balance (€): 1000

Credit in Default: no

Housing Loan: yes

Personal Loan: no

Contact Method: cellular

Last Contact Day: 15

Last Contact Month: jan

Contacts in Current Campaign: 2

Days Since Previous Campaign Contact (-1 if none): -1

Previous Campaign Contacts: 0

Previous Campaign Outcome

unknown
